Subject: Drain Valve Contamination

Dear Valued Customers,

CIRCOR Aerospace and Defense has received numerous drain valves returned for service containing foreign object debris, to the point where it has become a health hazard to our repair technicians performing inductions and evaluations. All valves should be flushed of all foreign debris prior to returning to CIRCOR Aerospace, Inc. for service.

Effective immediately, CIRCOR Aerospace, Inc. will return any unit(s) in "as is" condition with NO work performed if the unit is received with hazardous waste, such as fecal matter, live or dead animal larvae, etc. Your immediate attention and cooperation is requested to avoid delays in service and to limit any additional logistical expenses.

If you have any questions or concerns on the matter, please feel free to contact me directly.
